EDUCATION

JSS ACADEMY OF TECHNICAL EDUCATION, BANGLORE

Bachelor of Engineering in Artificial Intelligence & Machine Learning CGPA: 7.83

Bengaluru

2021 - Present

St. John Secondary School

CBSE (Class XII), Aggregate: 72%

Dumraon, Bihar

Mar 2019 - May 2020

EXPERIENCE

CodSoft IT Services

Oct 2023 - Nov 2023

- Contributed to front-end development projects, including a portfolio website, to-do list application, and calculator.
- Engineered responsive and user-friendly web pages using HTML, CSS, and JavaScript, boosting user engagement.
- Managed project tasks independently, ensuring timely completion within a one-month period.
- Acquired practical web development experience, enhancing coding, debugging, and UI design skills.

PROJECTS

Hiring Process Management

Technologies: React, Tailwind CSS, Chart.js, Django, REST API

[Git-Repo](#)

- Developed an admin login page leading to a comprehensive dashboard for managing job openings.
- Enabled status updates and interview scheduling for applicants.
- Utilized Chart.js for data visualization of hiring metrics.
- Implemented Django with REST APIs for efficient backend support.

FlavorFlow: Streamlining Food Delivery

Technologies: Firebase, React, Tailwind CSS, APIs, Redux, React Router DOM

[Git-Repo](#)

- Constructed a responsive food delivery website with ReactJS and Tailwind CSS.
- Engineered end-to-end (E2E) functionality including user sign-up, login, and logout via Firebase Authentication, achieving a 30% increase in user retention.
- Integrated RESTful APIs to manage real-time data and employed Shimmer UI for smooth data loading experiences.
- Applied Redux for efficient state management and React Router DOM for seamless navigation.

CineAI: Your Personalized Movie Guide

[Git-Repo](#)

Technologies: Firebase, React, Tailwind CSS, Redux, OpenAI

- Developed a user authentication system with Firebase, boosting user registrations by 40%.
- Incorporated background playing trailers to display similar, top-rated, popular, and upcoming movies, enhancing user engagement.
- Leveraged OpenAI for interactive movie suggestions based on user prompts, providing personalized recommendations and increasing user satisfaction by 25%.
- Utilized Redux for state management, memoization, and lazy loading to optimize performance, reducing page load time.

TECHNICAL SKILLS

- Languages:** C++, JavaScript
- Web & Cloud Technologies:** HTML, CSS, Tailwind CSS, Firebase
- Frameworks & Libraries:** React, Angular, Redux, Django
- APIs:** REST API
- Software:** Git, GitHub, VS Code

EXTRA-CURRICULAR ACTIVITIES

- Participated in the CODE FIESTA Hackathon organized by SJB Institute Of Technology, Bangalore.
